SKILLS

LANGUAGES - Experienced
Python, Javascript, C++,
HTML, CSS

LANGUAGES - Familiar
Java, C, SPARC

TECHNOLOGIES UNIX, Vim, Git,
PostgreSQL, AWS,
Heroku, Sketch, Jekyll

FRAMEWORKS Flask, Tornado, Express,
React, Redux, JQuery,
Foundation, Bootstrap,
Scikit-learn, OpenCV,
Phalcon

ORGANIZATIONS

DESIGN.UCSD Tech chair - organizes
meetings, holds
March 2015 workshops and
- Present organized development
and built most of Jekyll
site [http://
designucsd.org](http://designucsd.org)

DS3@UCSD Member - Attended
workshops and
December 2015 compared deep
- March 2016 learning classifiers
including ConvNets and
M3N on the MNIST and
YaleB Face datasets.
Implemented KNN,
KMeans, and
multinomial Bayes'
from scratch

EXPERIENCE

Web Development Intern @ Solomid Corporation

January 2016 - Present

- Built frontend of <http://tsm.gg> using React/Redux
- Rebuilt frontend guide creation functionality and launched usability and interface fixes for the revamped <http://solomid.net>
- Built an **async, self-caching League of Legends data tooltip API** used on <http://probuilds.net> and <http://champion.gg>
- Used ES6+ Javascript, React, JQuery, Foundation, and Phalcon

Instructional Apprentice @ UC San Diego

September 2016 - Present

- FA16: COGS187A: Cognitive Aspects of Digital Design
- WI17: COGS120: Human-Computer Interaction
- Teaching introductory web development and design principles to a class of 100+ students. Held workshops and office hours.
- Wrote script to automate grading of HTML/CSS coding projects

Tech Lead - SD Hacks

March 2016 - Present

- Coordinated and participated in design and development of SD Hacks site <http://sdhacks.io> and resume filtering tool for sponsors, built using MEAN stack.
- Crafted flyers for SD Hacks events and prototypes of [sdhacks.io](#).
- Designed and built Hack Day site [hackday.sdhacks.io](#)

EDUCATION

University of California, San Diego

October 2014 - Expected June 2018 Major GPA - 3.73 - Provost Honors

B.S. Computer Science, Minor in Cognitive Science

Topics learned: computer organization, systems programming, web design and software development, data structures, algorithms, and machine learning

COGS187B - Practicum in Professional Web Design

CSE100 - Advanced Data Structures

COGS185 - Advanced Machine Learning Methods

CSE101 - Design and Analysis of Algorithms

CSE110 - Software Development

PROJECTS & HACKATHONS

Design at UCSD Website

June - September 2016 - designatucsd.org

- Did user research, storyboarding, sketching, wireframing, prototyping and built resulting site with HTML/CSS and Jekyll
- Wrote and presented Markdown HTML/CSS workshop tutorials

BitMonster - 1st Place Blockchain API @ CalHacks

October 2015 - bitmonster.herokuapp.com

- Multiple-alias and anon Bitcoin payment web application
- Worked on Bitcoin wallet authentication, transactions and frontend; used the Blockchain API, Flask, HTML/CSS/JS, ReactJS, JQuery, Heroku, SQLite. Won \$1250 in Bitcoin

Kingmaker @ Money2020 Hackathon, Las Vegas

November 2015

- Zero stop shopping - uses **facial recognition** to authenticate and commit seamless checkouts.
- Worked on **facial recognition** and **transaction processing** and **frontend** using OpenCV, NumPy, MeteorJS, ReactJS
